ntage of using the data screens is that they provide a nt summary of the enhanced equirements and coloured to guide you through the on.

ote: Escro data collection does ort multiple patient consultations, consultation should be open at ime.

he button at the top of the will launch the data collection You will be prompted for your ername and password the first time you use the screens.

This creates a separate consultation and you should select the consult type and date from the dropdowns. The date can be changed if entering data retrospectively.

			Consult type	Surgery consultation	~	Consult Date	08 February	2010	<

		FAST Questionnaire							
		Brief Intervention							
	<		Ш						

The summary grid provides a list of data required for this enhanced service. The grid only displays the most recent historical entry for each item.

You can navigate to the appropriate screen for data entry by clicking on the item in the grid or using the menu on the left. Any relevant documentation or links can also be found on this menu.

The coloured indicators show the status of the data and the indicators on the grid represent the status on entering the consultation.

		hanced service - p ven if screened by	lease record which category of clinical presentations (listed in
SIGN 74) prompte		200	anouner agency.
SIGN 7		uate	
SIGNT	4 list		
Social		Psychiatric	

On the data entry screens the indicators will change according to the data entered during the consultation. This may be to confirm data has been recorded or to remind you that further data is now required.

When the consultation is complete, you should save the data using the 'save & exit' button on the toolbar. Clicking cancel will discard any data entered.

Save and Exit 🚫 Cancel 🔑 Settings
