

Enhanced Services Contract Reporting Options

Alcohol

Scots, across all ages and socio-economic groups, are drinking more than is good for them by regularly exceeding the daily and weekly recommended levels of alcohol. The effects of excessive consumption are getting worse. Scotland now has the fastest growing liver cirrhosis rates in the world (2.5 times higher than in England and Wales). One Scot dies every six hours as a result of an alcohol-related illness.

The EScro Alcohol module provides a full data collection and reporting solution providing an integrated software suite for both consultation and reporting on patients participating in an Alcohol Enhanced Service. As with all EScro modules screens and payment criteria can be customised to reflect local services.

Designed for use in the consulting room, the patient summary screen provides clear visual indicators highlighting missing or out-dated information. All data recording requirements and supporting documentation are within a few clicks of each other.

This ensures that key information required for monitoring the Enhanced Service can be recorded opportunistically while the patient is present, reducing the need to recall patients for administrative reviews.

Summary

Indicates data has not been entered (Red dot) Indicates data is outwith required date range (Yellow dot)

Description	Date	Comments
Alcohol - enhanced service	14/07/2008	social

All previous Alcohol data

Date	Description	Comments
21/07/2008	Nondependent alcohol abuse, unspecified	
18/07/2008	Symptom severity	22
14/07/2008	Moderate drinker - 3-6u/day	
14/07/2008	Health ed - alcohol	
14/07/2008	Alcohol misuse - enhanced services administration	social
14/07/2008	Health ed - alcohol	
07/07/2008	Alcohol misuse - enhanced services administration	

Items requiring attention are marked with the appropriate coloured indicator. You can go directly to the screen requiring attention by clicking on the item, or by using the menu above.

When on the appropriate screen, the item requiring attention will be highlighted with blue text. In addition to this, a blue "P" on a yellow background indicates the data is required for enhanced service payment.

The Submission Verification tool provides in-depth management information for the entire Enhanced Service and on a patient by patient basis. Both payment criteria and best practice requirements are clearly shown allowing practices to effectively manage their Enhanced Services.

Practices have the assurance that regardless of size, location or clinical system every claim is measured by the same rule set. As information is extracted directly from the patients' record, administration is reduced to a minimum.

Based on locally defined best practice and payment criteria, health boards can have confidence that every patient receives a minimum standard of care. Only claims that have passed the minimum criteria can be submitted for payment.
