

## Enhanced Services Contract Reporting Options

## Overview

The EScro package provides a fully integrated read code based solution for audit and verification of Enhanced Service activity prior to submission for payment. In Gpass the data collection module is implemented as a consulting room extension allowing full access to existing patient demographics and clinical history.

Vision and EMIS practices are provided with Guidelines/Templates containing the same recommended read codes that can be imported into their local index. Each of the Enhanced Services categories is displayed in their	Previous Encounter Encounter History Care Management Values Summary EScro EScro FV   Misc Services Diabetes Drug Misuse Learning Dis CVD Carers Sexual Health COPD   IUCD / Implanon Depression Minor Injury NPT Alcohol Minor Surgery Anticoagulation M.S. Every claim for payment is validated against a set of minimum criteria defined by the local health board. Only once this standard has been met will the claim be passed to finance for payment. A full audit trail is maintained linking every payment to a patient. All audits are performed in-house with no requirement for patient information to leave the practice.

If you require further information or would like a demonstration Please call our information desk on 01463 667356
